

How do I determine where I fit on your sliding scale?

Please sit with the information below, and determine which statements are true for you in each section. The more prompts you select in the higher range, the more you would pay on the scale. The more prompts you select in the lower range, the less you would pay on the scale.

This is a guide and not meant to capture your full lived experience. You may experience shame or guilt when reading these prompts, which is normal! Please be kind to yourself in the process. This guide is meant to support you in authentically and more holistically determining your level of financial privilege so you can accurately choose a fee on the scale. This is important because those who pay a higher fee are subsidizing those who cannot. Your honesty and accountability are helping to build equitable and sustainable systems of care.

Assets Include: home ownership/mortgage, retirement or savings accounts, stocks/bonds, vehicle ownership, etc. "Family" includes both biological and chosen family.
